

Olympic Legacy Sports Funding Report Year 1 2013/14.

This has been an extremely successful first year with over 50 additional activities and events taking place during the year. This has enabled us to widen participation and encourage far more children to take place in additional sporting activities and competitions than in previous years. The majority of these activities have been coordinated by Jack Hunt School as part of the cluster programme for which we contribute £6000.

Inter-School Competitions.

Two football teams have attended 8 football tournaments during the year and the netball team attended 4 tournaments. The football team qualified as cluster runner-up for the city cope and were unlucky not to progress to the quarter-final. The cricket team attended three tournaments qualified as runner-up in the Peterborough city cup and were 10th in the county championship. In addition children from across the school have attended a dodge-ball tournament, cross country events Olympic legacy event at Jack Hunt School.

Inter House Competitions.

We have extended our range of into house competitions this year, in addition to cross country king ball volleyball and extensive sports days across the school we employed a member of staff to run into house competitions three times a week at lunchtimes. This has included tag rugby basketball cricket football and long ball. This has enabled large numbers of children to participate in competitive sports on a regular basis.

Motivation.

Over 100 children participated in the Olympic legacy challenge this year where they had to independently demonstrate commitments to each of these six Olympic values. Over half of these children completed the whole challenge. 4 children have undertaken ambassador training and activities this year and we continue to run our young leaders program with 20 children in year five completing the training. We have received visits from Gareth Herbert British table tennis champion, and Charlotte Edwards lady's England cricket captain and Goldie Sayer British javelin champion during the year. They all spoke to the children about how they became involved with sport, how it has influenced their lives and all gave demonstration lessons and advice to groups of children.

Other

All staff have received training on delivering our dance curriculum and observed model lessons from an external provider. 3 staff have accessed PE training provided by the cluster. 16 children took part in interschool country dancing Festival and 40 children experienced a morning sailing, (a completely alien activity to most of them!), through our trust partner Anglian Water
